ABOUT

Motivated second-year B.Tech student with a strong interest in Data Structures and Algorithms and Machine Learning. Currently strengthening problem-solving skills using C++ and building a solid foundation in Python for ML. Actively working on real-world projects and continuously improving technical expertise.

EDUCATION

IMS Engineering College <i>B.Tech in Computer Science and Engineering</i>	Aug 2024 - Aug 2028 <i>CGPA: 8.56</i>
V.K.S Public School, Moradabad <i>Higher Secondary (Class XII)</i>	July 2023 - July 2024 <i>85%</i>
V.K.S Public School, Moradabad <i>Secondary School (Class X)</i>	May 2021 - July 2022 <i>91%</i>

EXPERIENCE

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript(basics)
Core Concepts: Data Structures and Algorithms (Learning), OS
Web Technologies: HTML, CSS
Machine Learning: NumPy, Pandas (Basics)
Tools: Git, GitHub, VS Code

PROJECTS

Swashakti – Women Empowerment Platform GitHub <i>Frontend Web Project</i>	HTML, CSS, JavaScript <i>2025</i>
- Developed a responsive web platform focused on women empowerment and awareness initiatives. - Designed structured layouts and interactive UI components using HTML, CSS, and JavaScript. - Ensured cross-device compatibility and responsive design principles.	
Number Guessing Game GitHub <i>Console-Based Application</i>	Python <i>2025</i>
- Built an interactive number guessing game using Python. - Implemented conditional logic, loops, and random number generation. - Handled user input validation and multiple attempt tracking.	
Rock Paper Scissors Game GitHub <i>Console-Based Application</i>	Python <i>2025</i>
- Developed a command-line game enabling user vs computer gameplay. - Applied game logic using conditional statements and Python's random module. - Implemented score tracking and multi-round functionality.
